

Using Vitals for Coaching

Eran Holt & Jared Berry

Summary

This video discusses utilizing Vitals for Youth Ministry, a series of videos and materials to equip and develop youth pastors and leaders. We outline three approaches to leveraging Vitals: convey (sharing the videos to introduce new ideas), coach (using the videos as a starting point for coaching conversations), and consult (providing personalized guidance and advice based on the leader's specific context). The conversation highlights the importance of continuous growth, challenging assumptions, and tailoring support to each leader's unique situation.

Main Points

Convey: Introducing New Ideas

The first approach, 'Convey,' involves sharing the Vitals videos with leaders to introduce new ideas and disrupt their normal thought patterns. This can help challenge assumptions, reinforce positive practices, and encourage growth. It's the easiest approach but potentially the least effective for long-term development.

Coach: Facilitating Critical Thinking

The second approach, 'Coach,' involves using the Vitals videos as a starting point for coaching conversations. By asking powerful questions, the coach helps leaders learn to think critically, problem-solve, and develop solutions. This approach requires more time investment but can be more effective for long-term growth.

Consult: Personalized Guidance

The third approach, 'Consult,' is the most time-consuming but potentially most effective. It involves providing personalized guidance and advice based on the leader's specific context and situation. This approach combines elements of conveying new ideas, coaching, and consulting to tailor support to each leader's unique needs and challenges.

Action Items

- Send Vitals videos to leaders regularly (e.g., monthly or weekly) to introduce new ideas and concepts.
- You can schedule one-on-one or group coaching sessions to discuss the Vitals videos and ask powerful questions that facilitate critical thinking and problem-solving.
- Offer personalized consulting sessions to provide guidance and advice tailored to each leader's context and situation.
- Combine the three approaches (convey, coach, and consult) for a comprehensive strategy to support and develop youth pastors and leaders.
